“Advanced Software Development student looking to create digital products and offer solutions through technology. I'm looking to advance my career by gaining practical experience. “

Experience

11/2024 – Current

FULLSTACK DEVELOPER | [INFINITE DEV](#)

Participation in multiple software development projects, both front-end and back-end, with a focus on mobile applications and CRM/BI systems.

Featured projects:

- **Rigthe – Advanced Golf GPS & Scoring App (iOS & Apple Watch)**
Mobile app development in **React Native, Swift, and Ruby on Rails**, integrating geolocation, scoring, and cross-device synchronization features.
- **Hortaria – Hydroponic Management & Business System**
Development of a **CRM in React**, focused on business management and production processes in hydroponic systems.
- **Visco – CRM, BI Panel & Business Automation**
Platform for the largest optical laboratory in Brazil. I work with React for the frontend and support databases with DBeaver, optimizing automation processes and BI dashboards.
